

JUST GLEANINGS

OIL IN STEEVIE FIELD

Indications of a new oil field for Alberta were made last night as Anglo Canadian's No. 2 well at Steevie blew in with tremendous gas and oil flow, blowing crude oil to the top of the derrick. Early reports from the field said that the well was getting out of control with wet gas flow estimated at 10,000,000 cubic feet per day. No estimate of crude oil production could be given.

When the crew ran the drill stem back into the well to make a test and to stop the gushing, the cement plug, which was nine feet in the line, the well broke loose, throwing the 3300 feet of heavy drilling fluid into the air and immediately began to flow oil.

SHOULD CONVERT MANY FARM AREAS BACK TO GRAZING

WINNIPEG—Many Saskatchewan and Alberta farm areas should be converted to grazing land or commodity pasture, but the farmers not yet displaced by the farmers' safety net, Mr. J. Cope, senior economist, marketing services division of the federal department of agriculture, said yesterday.

Since 1936 Mr. Cope has been engaged in a survey to determine the productivity of Alberta and Saskatchewan areas for grazing, with a view to establish a basis for readjustment of western agriculture.

On May 28, 1939, he was appointed in the drought areas of Saskatchewan near Moose Jaw, 38 per cent of the farm lands were found suitable for wheat and 62 per cent were

higher in Alberta, he thought.

If you have visitors, or know of any unique happenings it makes news and The Chronicle would be glad to hear of it.

ANGORA WOOL FROM CANADIAN RABBITS

Centered in the village of Abercorn, Quebec, the Canadian Wool of Canadian Industries, the breeding of angora rabbits on a commercial scale, is now entering its third prosperous year. Run on a co-operative unit of several breeders, the rabbits, about six hundred angoras, each producing about a pound and a half of wool a year. An increasing demand for the wool is being met by adding the industry in its infancy.

Eight times as many as "sheep's" wool, the demand is strong. Living for aviation uniforms, mufflers, garters and scarves. Hollywood also uses angora in lime silk dresses to prevent them from rusting during the microphones.

A feature of the Canadian wool is that it does not include the immature varieties. The Great Mountain climber and the diet which includes an ample ration of iodized salt are said to be responsible for the superiority of the Canadian wool.

Dick Heath was a Calgary visitor the first part of the week.

Good progress was made in the work of cleaning up the Carbon park yesterday afternoon and there is now a noticeable improvement in the appearance of the focal "beauty spot."

VOLUME 18; NUMBER 15

OFFER TO SPREAD BAIT FOR 'HOPPERS MADE TO CARBON MUNICIPALITY

Would Use Aeroplane to Distribute the Poison

BY-LAWS PASSED

Councillors J. J. Ohlhausen, C. B. Baynn, H. Offer, H.H. Crowell, J.W. Reilly and Reeve John R. McEwan voted in favour of the council meeting of the Municipal District of Carbon held on May 2nd.

It was decided to locate the grasshopper control station again in year and Chas. Trumbo was appointed as operator.

There being no wild hawks, the committee responsible for assessment under terms of the M.D. Act, a motion was passed to this effect.

The committee was received from T. H. McEwan of Letton, asking if the municipality would consider an offer to spread grasshopper poison by airplane. The secretary was instructed to get further information on the offer.

By-law No. 80, providing for the payment of an elevation grade, was given three readings and passed.

By-law No. 81, giving the farmers an opportunity to consolidate taxes due, was passed.

Reeve J.R. McEwan reported on the meeting of the Drumheller Municipal Council held on May 1st. It was decided that a proposal was made to build an isolation hospital at Drumheller. Specifications of the proposed building were given. The Department of Health and when re-estimated a further discussion will take place at another meeting.

The re-estimated cost of the proposed hospital was \$100,000. The Dr. Cope did not receive the proposal very favourably.

The re-estimated cost of the municipality was reviewed at some cancellation made.

The secretary was instructed to meet with the Water Dept. of the City of Calgary to purchase price of used sewer pipes, which could be used for the proposed hospital.

The secretary was also authorized to write to the Land Department of the C.P.R. regarding weed control on their property within the boundaries of the municipality.

LOCAL NEWS ITEMS

Mrs. McCrady, Mr. and Mrs. Herb McCrady and son, Mr. and Mrs. Skerry and son, arrived in Carbon yesterday evening, accompanied by Miss Carmen Bingham of Caroline, who is visiting with Mr. and Mrs. H. McCrady.

Mr. Foxon is doing considerable work on his corner lot next to the house and is putting in a rock garden.

Little enthusiasm was shown at the meeting called last Friday to discuss re-organization of the Golf Club.

PROVINCIAL

DUST STORMS NUMEROUS

High winds the past week have brought dust storms almost daily, although Monday was by far the worst when at about one o'clock in the afternoon the skies were black with visibility less than one hundred yards. Fortunately rain showers occurred on the Thursday and Friday previous, and as a result sand drifts have been kept to a minimum, although by the display of dust Monday some farm lands to the north-west must have blown half way—if not having moved to a new location altogether.

CARBON BASEBALL CLUB RE-ORGANIZES FOR THE SEASON AT MEETING WED.

P. Edwards, President; B. Kapanui, Sec.-Treas.

GOOD BALL TEAM

A re-organization meeting of the Carbon senior baseball club was held in the Garrett Motors office on Wednesday, May 3rd. It was decided to name the club the Carbon Farmers and the following officers were elected:

President, Percy Edwards.

Sec.-Treas., Mr. Kapanui.

Manager, Jack Mathers.

The necessary work on the diamond was done during May and it was decided to name the club the Carbon Farmers.

A committee of three, to be selected by the secretary, will be elected to club the ball.

The baseball club operated successfully last year, and with the addition of new players Carbon should have a good ball team this year.

The club has sent in an application to participate in the baseball tournaments of the Alberta Sports Day on May 24, and this year the club should be ready for the season's play.

THE ACREAGE BONUS PLAN

The federal government has decided to change its wheat legislation and the acts covering the same will be revised.

A minimum price of 70¢ per bushel is being provided for the amateur legislation and the acreage bonus plan is being changed to the following plan:

One dollar an acre where the yield is from 8 to 12 bushels.

One dollar and fifty cents where the yield is from 4 to 8 bushels.

Two dollars per acre where the yield is not more than 4 bushels.

A new provision permits a farmer to receive a guaranteed minimum price on not more than 5,000 bushels of wheat and 10,000 bushels of barley.

It is the intention of the government to encourage existing small farmers, provided for farmers who attempt to get the minimum price on more than that volume of wheat.

An "a-to-z" to farmers with poor crops is a welcome feature of the legislation. It should be emphasized, however, that all these are emergency measures and must be modified as soon as possible.

A determined effort must be made to open new fields and expand markets

as far as possible to help the plan work a hardship on the man in business, and it is this provision in the Act that is causing so much concern to the taxpayers.

SWIMMING POOL NOTES

Work has been proceeding this week at the pool on the hill, which is being set down below the ground surface to provide better heating arrangements.

The pool should be ready for operation about May 24th.

The pool will be through the winter in its shape, and no cracks in the cement were caused by frost. A day's work will have the pool ready for the water.

70¢ PRICE INSUFFICIENT SAYS ELEVATOR MAN

William G. Bales, member of the North-West Grain Dealers' Association and a member of the Bracken delegation which waited on Premier King at the Farmers' cabinet at Ottawa, made the following statement with regard to the Government's amendment to legislation:

"The changes in agricultural legislation, especially the increase in the basic price of wheat to seventy cents, is a practical recognition of the justness of the farmer's cause, but it is not enough to meet the needs of the farmer."

The changes in agricultural legislation, especially the increase in the basic price of wheat to seventy cents, is a practical recognition of the justness of the farmer's cause, but it is not enough to meet the needs of the farmer."

"The proposal to limit the price of wheat to a maximum of 5,000 bushels delivered by an individual farmer is an arbitrary decision. It gives no consideration to the economic factors surrounding larger scale farm operations, and it is a proposal which does not serve any essential class of farmers. Furthermore, if open market prices increase to 70¢ per bushel, it will be 10 cents over the 5,000 bushels in competition with the Wheat Board."

"An 'a-to-z' to farmers with poor crops is a welcome feature of the legislation. It should be emphasized, however, that all these are emergency measures and must be modified as soon as possible.

It is the intention of the government to encourage existing small farmers, provided for farmers who attempt to get the minimum price on more than that volume of wheat.

A determined effort must be made to open new fields and expand markets

as far as possible to help the plan work a hardship on the man in business, and it is this provision in the Act that is causing so much concern to the taxpayers."

MANY APPEALS HEARD BY VILLAGE COUNCIL AT THE COURT OF REVISION

Few Changes Made at Special Council Meeting

CAN STILL APPEAL

At the Court of Revision for school and Village assessments, held Friday afternoon in the secretary's office, quite a number of appeals were heard, the result of which Mr. Walker, who made the assessment last fall, was present and explained to those present just how the assessment had been made to date.

On Monday night the Council of the Village of Carbon held a special meeting to consider changes that might be made after the outcome of appeals, and by going over the assessments again, the Council decided on four changes, but in the majority of cases the assessment had been declared fair and all concerned.

The changes in agricultural legislation, especially the increase in the basic price of wheat to seventy cents, is a practical recognition of the justness of the farmer's cause, but it is not enough to meet the needs of the farmer."

Persons who have appealed, but who are not satisfied with the decision of the Court of Revision, can still appeal to the Court of Revision, which will make a final decision.

It appears that certain provisions of the Assessment Act, which the school and village school cannot take the Village assessment as a basis of taxation. Under such a plan, where the school rate is raised so much, more money for operation is required, which plan works a hardship on the man in business, and it is this provision in the Act that is causing so much concern to the taxpayers."

REPORT OF 1938 JUNIOR BASEBALL TEAM

Games played, 19; won 13, lost 6.

Goals received 97.50

Won at tournament 25.00

Donations 46.00

Unpaid bills, bats, balls, etc. 176.50

Starting the season the year, the games arranged to date are:

Three Hills at Carbon May 21, 2.30 p.m.

Drumheller at Carbon on June 2, 2.30 p.m.

A game will be held in the Farmers' Exchange Hall on June 2.

The Junior Boys and committee wish to thank everyone that took part in making the team a success, a great many hours and a great deal of time and energy were spent in the preparation of the team.

Carson's "Merchant Tailor," Alex Sobolsky, has had a new shop added to his business establishment.

Worth Investigating

If statements made by George A. Hurst of Regina, as they appear in a pamphlet entitled "Saving the Hudson Bay Route," which has recently been widely distributed by the On-the-to-the-Bay Association, are well founded, it would appear that it is high time Western Canadians gave some attention to allegations that the route is being threatened and gave some consideration to a resolution recently passed by the Association.

The resolution to which reference is made reads:

That this Association go on record as being in favor of the principle of Western Canada management of the commercial facilities of the Port of Churchill and that this should be done under the control and management of a Western organization in conjunction with the provincial governments of Saskatchewan and Manitoba.

In preferring his charges that the route is being undermined and rendered ineffective, partly because of lack of knowledge or indifference on the part of the shipping lines, he should have given far more information and partly because the route is being, in conjunction with remote officials, to heling the use of the route with impossible restrictions. Mr. Hart should know whereof he speaks, for during most of the construction period and the entire time the port has been in operation up to January, 1938, he resided and worked at Churchill as account manager for the Hudson's Bay Company.

For the record, signifying that, while the On-the-to-the-Bay Association claims any responsibility for the correctness of the statements and charges made by Mr. Hurst in his pamphlet, the Association evidently considers them of sufficient importance to warrant wide publicity for them, by making arrangements for distribution of the pamphlet and by pointing out that although the contents were published earlier in a series of articles "as far as we are aware no one has come forward to dispute the truth of the statements made."

Inquiry Desirable

The fact that Mr. Hurst was in a peculiarly favorable position to secure the information on which he bases his premises, coupled with the sponsorship of the pamphlet by the On-the-to-the-Bay Association, an organization which has carefully steered clear of politics in its activities, indicates the desirability of an inquiry being made into the method of operating the route, with a view to some change in the form of management of the port and its facilities. An investigation shows that the efficiency of the route is being threatened by other interests and the interests of the prouders are not being protected.

When it is remembered that over fifty million dollars has been invested in the Hudson Bay railway and the Port of Churchill and that, if Mr. Hurst is correct, the great bulk of the cost was borne by the western provinces, it is evident that the interest of the provinces in this large expenditure is protected, and that it is made to yield the return which was expected of it during the half century fight to establish a short and direct export and import route between the prairies and the European continent.

If the port is being allowed to languish and the route to die of inaction, as Mr. Hurst claims when he speaks of it as "the starved and unwanted child," with specific details to support it, then no time should be lost in taking whatever steps may be necessary to revitalize the route and, if possible, to make it the important and effective artery it was intended to be.

Interesting Suggestions

Any person who reads the pamphlet with care cannot fail to be impressed with the background of knowledge of his subject apparently displayed by Mr. Hurst and the apparent prima facie case which he makes out for a change in the management of the port and its facilities and other proposals he makes to change the use of the port and encourage it to return to greater dividends to prairie producers and Western business.

Not the least interesting of Mr. Hurst's statements are contained in the chapter devoted to freight rates, in which he contends that the average rate on the Great Lakes from 1932 to 1937 was 4½ cents compared with an average of 8½ cents before Churchill entered the lists as a competitor.

If the figures are correct there seems to be some foundation for the assumption that, even though only a small fraction of the crop was handled through the Bay route during that period, the very existence of this alternative and had an important bearing on the returns to the farmer for the crop on that six-year period, provided the savings were returned to the producer.

On this basis, what might happen to rates on the Great Lakes were the Bay route to become the negative factor and the Port of Churchill shown up as a "white elephant" is a subject for interesting speculation.

Even if some of Mr. Hurst's claims could not be established, the suggestion that the administration of the port be turned over to a body of Westerners, who could be relied upon to turn to steady navigation or whatever active to the port's business for the Hudson Bay route seems to be a reasonable one. After all, the west is the parent of the project and will surely be depended upon to nourish the youngster much better than a father mother.

King George Opens Hospital

Children's Wings Bear Names Of The Two Royal Princesses

The King opened the new Westminster Hospital in London, England, in response to the address of behalf of the governors of the institution, said the new buildings "incorporate the latest improvements in hospital planning and technique." His Majesty also announced that the children born in one of the new hospital will bear the names of his daughters and be known as "Princess Elizabeth Wing" and "Princess Margaret Rose Wing."

England is showing more interest in space, according to overseas dispatches.

Weather proof mirrors have been devised for use in astronomical and optical measuring instruments.

A New Industry

Iceland Spar Is Being Developed In South-West Africa

A new industry—the production of Iceland Spar—is being developed in South-West Africa, formerly German colony which is now under mandate by the Union of South Africa.

The mineral Iceland Spar was discovered in the territory in 1928. It is a crystal which has wide uses in the manufacture of optical instruments, television sets, color photography apparatus, lasers, microscopes, cameras, projectors and ranging devices.

Reserves are such that South-West Africa would be able to fulfill the requirements of the entire world.

There are estimated to be 280 radio sets in operation for each 1,000 residents of the United States.

WORLD HAPPENINGS
BRIEFLY TOLD

Two Italian soldiers were reported to have deserted their infantry regiment posts and entered France to enter the Foreign Legion.

Harry Bissell of Weston, Ont., celebrated his 50th birthday on May 2 by stepping into an aeroplane and flying to Vancouver to visit his niece.

First to answer a call from Police Chief Tisdale for volunteers to act as special constables during the visit of the King and Queen to Niagara Falls, Ont., was an Italian citizen.

Sir Ernest MacMillan, principal of the Toronto Conservatory of Music, in an interview with a newspaper, announced that scholars from Canada had aid impoverished musicians of exceptional talent.

Anthony Eden, former foreign secretary and newly appointed to the rank of major in the Territorial army, issued a statement of his own description as democratic and "expressing the nation's will."

Rosita Forbes, British author-explorer, announced she had bought an island in the British West Indies called Eleuthera, "eight miles from civilization," where she would make her home.

Japanese embassies officials announced opening in Shanghai of a new Japanese-owned bank, called the Hushung Commercial Bank, capitalized at 50,000,000 Shanghai dollars (\$8,000,000).

Alfred, Lord Cliford, minister for foreign affairs, said that with his pins for conviction, Britain would have over 1,000,000 men for empire defence without calling on reserves or the civilian defence.

J. H. Ross, in charge of the Alberta program under the Dominion-provincial youth training scheme, announced 40 new Alberta centres next week. Last winter 30 centres in Alberta operated training centres.

Interesting Speculation

Many European Thieves Have Been Offered To Engulfion

It is an interesting speculation whether the recent history of Eastern Europe might have been "written differently" had certain Englishmen been more amenable to the demands. We find that three buttons—the late Lord Headley, Sir Charles Watkin Hamilton, and the first Lord Inchcape—were offered the throne of Austria, and was rumored some years ago that a good many Hungarians were prepared to nominate Lord Rothiemere as their sovereign.

It is the beginning of another Haven when all Prince Louis of Battenberg, was officially offered the crown of Bulgaria, and before Prince George of Denmark accepted the throne of Greece Gladstone was informed that it could be his "for the lifting of an eyelid."—Manchester Guardian.

Walking Licences

Is Issued to South African Children Familiar With Traffic Laws

Walking licences are issued to children in Malvern West School, Johannesburg, South Africa, which is teaching its pupils to be "traffic-minded."

The licences are issued after an examination on the following subjects:

How to cross the street.
Stay on street.
Dangers of hanging on the backs of cars.

Giving other children lifts on a bicycle.

If a license-holder breaks any rule, he will be brought before a jury of pupils who can inflict penalties such as fines or endorse the culprit's license.

A Strange Carge

Best Docks At Halifax With Ship-ment Of Two-headed Snakes

Every now and then a modern Noah's Ark arrives in Halifax with a cargo of two-headed snakes. The last time up, the last straw was a shipment of two-headed snakes aboard the Rotterdam-Lloyd freighter, "The Star." The snakes known to naturalists as cymophanes are endowed with cymophanes appendages consisting of an extra head appended to their body a short distance below their other head. The reptiles belong to A. Field, of Williamson's N.Y.

Experiments have indicated that dull blue walls in operating rooms are helpful to the surgeon, causing eye strain than white.

Ornithologists have determined that 600 distinct species, with 1,200 sub-species, of birds exist to-day.

Consider It Great Honor

New York. Friend Of Being Instructed With Magna Carta

Major F. H. LaGuardia and Police Commissioner Lewis J. Valentine, guarded by 45 policemen, delivered one of the four original copies of the Magna Carta to the British pavilion at the New York World's Fair. Gov. Fred D. N. Haggard, British Consul General in New York, handed the historical document over to the British Consul General Valentine at the British Consulate, 25 Broadway, and accompanied them to the Fairway site in Flushing.

The document, lent to the British government by the Dean and Chapter of Lincoln Cathedral, was signed by King Edward I of England in 1215 at Runnymede on the River Thames.

King Edward I, King of England,

was an Italian citizen.

Sir Ernest MacMillan, principal of the Toronto Conservatory of Music, in an interview with a newspaper, announced that scholars from Canada had aid impoverished musicians of exceptional talent.

Anthony Eden, former foreign secretary and newly appointed to the rank of major in the Territorial army, issued a statement of his own description as democratic and "expressing the nation's will."

Walking Licences

New Discovery Said To Assist Insects In Breeding

An infant here gasping. With each move and each twist, she will stop trying entirely. If there were only some way to learn the work those little lungs must do. There is beyond the law and no person is subject to one man. It represents a basic principle of democracy and we are glad to find that it has arrived safely."

As the document was turned over to the Mayor, 30 patrolmen stood behind the Mayor's desk. "This was escort to the Mayor by 125 motorcycle patrolmen and two sergeants. The scroll will be displayed in the Hall of Democracy in the pavilion.

HOME SERVICE

THE LIFE OF THE PARTY IF YOU CAN TAP DANCE

Learn To Tap In Home Lessons

A big hand at parties for the girl who knows a clever tap routine! How does she do it? Everybody asks.

But those tricky numbers that will make you stand out in the crowd are not so easy to learn. You can teach yourself, instructions, music, and even a tap routine, if you let your taps to music—as our picture shows.

So learn easily you can do the three-tap combination that's illustrated. Hum a favorite waltz tune, time your steps to it, and then distinct beats in each measure.

1. Step on left foot.
2. Step on right foot, feel forward grazing the floor with a clear tap sound.

3. Tap on left foot.

In no time you pick up other basic taps and learn great new trying combinations making up your own.

And in party show routines, you can teach yourself to "Shut your fingers, clap your hands—then cross with your singing style."

So learn easily you can do the three-tap combination that's illustrated. Hum a favorite waltz tune, time your steps to it, and then distinct beats in each measure.

1. Step on left foot.

2. Step on right foot, feel forward grazing the floor with a clear tap sound.

3. Tap on left foot.

In no time you pick up other basic taps and learn great new trying combinations making up your own.

And in party show routines, you can teach yourself to "Shut your fingers, clap your hands—then cross with your singing style."

ARMS BILL HAS ROUGH PASSAGE IN THE SENATE

Ottawa.—A vigorous but difficult stand against the government's defense purchasing board bill featured its passage through third reading in the senate.

Several amendments were directed against the government. Its proposals limiting non-competitive armament contract profits to five per cent were compared with current departmental contracts yielding a considerably higher figure.

Moving third reading, Senator Raoul Dandurand, government leader, declared both the finance and defense departments had been consulted on the proposed purchasing board would be able to administer the bill to protect the treasury and "at the same time give compensation to the contractors." One of the features of the bill is a limitation of profits of five per cent of the capital employed on a contract.

Several minor amendments were made in the bill by the senate and it will be returned to the commons again. The lower house previously had passed it.

The government leader told Senator Arthur Meighen, Conservative leader, that he could have informed himself of the measure the government would employ when Dr. W. C. Clark, deputy minister of finance, was before the senate committee on finance. Meighen said the committee had placed on the government the responsibility for that feature of the bill and the government had accepted it.

He said the only evidence to offer, contained in Senator Dandurand, but experience would show how the measure was to be operated. If war came the fears voiced by Mr. Meighen would disappear and the war Minister would bring into the War Department the bill, so that the country could take charge of "any institution it needed for defense of Canada." This would, of course, be operated by proclamation in event of war being "real or apprehended."

While he had no hope of convincing the government, there was still something to be done to let the country know what was being done by this government in going through," said Senator Meighen.

The country had been told the bill would not profit small business men who would not come out of the industry. The bill had gone to a committee and several citizens had appeared to give evidence. These were men engaged in the business analogous to the manufacturing contemplated in the bill, some in the actual business itself.

All had explained that the five per cent ceiling on contracts did not mean a cut in pent when other elements incorporated in the bill were taken care of. Where contracts ran for two years, the actual profit would be two cents.

No human being who has a right to be at large will enter into a contract where all the risks are his and he can only make the bank interest on the money he had to borrow," said Senator Meighen.

Alaska Highway

Public Hearings To Be Held In B.C. In June

Ottawa.—Public hearings will be held in British Columbia in June by the commission appointed by the government to investigate the practicability and desirability of a highway from United States through British Columbia and the Yukon to Alaska, Hon. Charles Stewart, committee chairman, said.

The commission will visit northern British Columbia and its neighboring mountain areas by way of the proposed route to study general character of the land. Public hearings will be held in Prince George and Hazelton, B.C., and in Whitehorse, Yukon Territory, to give local citizens an opportunity to express their views.

Belgium Expels German

Brussels.—The Belgian government has ordered the expulsion of a German newspaperman. Herr Edele, correspondent of the newspaper *Wesdeutsche Zeitung* and chief editor of the *Deutsche-Belgische Review*, was ordered to leave from an incident at a demonstration organized by the German Labor front.

Ready For Trip

Kamloops, B.C.—Miss Mary Beaufort, daughter of an English squire who planned a horseback jaunt across Canada, returned here from a Douglas Lake cattle ranch and said she has purchased the horse she will ride across the continent.

British Foreign Policy

Anthony Eden Wants To See More Reaching Agreement With France And Italy

London.—Sir Anthony Eden told his constituents "It must be a gain to peace if an understanding can be arrived at between this country, France and Russia, and the more far-reaching that agreement will be the better."

In his address the former foreign secretary supported the Churchill government's present foreign policy but urged the Winston Churchill first lord of the admiralty and minister of munitions during the Great War, be invited into the cabinet.

His views were expressed in the preface to a collection of his most important speeches in which he now enjoys that "at least, the world now enjoys that there is more than may be required to bring about an understanding of the Great War, and France were to put into effect their guarantees to Poland.

INITIAL PRICE IS SET FOR WHEAT AT 70 CENTS

Ottawa.—An initial payment of 70 cents a bushel for wheat sold to the wheat board up to a maximum of 5,000 bushels from any one producer in one crop year is provided in the repriced amendment to the Canadian Wheat Board Act.

The repriced bill also provides that the board is entitled to extend operations of the Wheat Board Act to wheat producers in the eastern division. Hitherto the act has applied only to the four western provinces.

The bill, which stands in the name of Hon. W. D. Elder, minister of trade and commerce, for second reading, originally provided for a guarantee of 60 cents a bushel.

It was revised with another bill in the name of Hon. J. G. Gardiner, minister of agriculture, having to do with the wheat board, in order to insert a series of amendments which would increase the scope of consultation with western wheat interests.

Mr. Gardner's bill was not changed to increase the guarantee advance payment from 60 cents to 70 cents a bushel.

Revised fertilizer plans have been seconded and plans made to reorganize the distribution of fertilizers, storing, stumps, tractors and other machinery, fuel, implements, seeds and other requisites for war time.

Bill on Bonus Land,

British Has Scheme To Bring 250,000 Acres Into Production

London.—Sir Reginald Dorman-Smith, minister of agriculture, announced in the house a bonus scheme to bring 250,000 acres of land into cultivation. A bonus of about \$9.35 an acre will be paid for grain land ploughed up in 1939.

The idea behind the bonus scheme is to increase the production of the country, but in wartime it would be used to grow essential foods. Elaborate plans have been drafted on wartime agricultural production. Sir Reginald said they could not yet come into operation to advance war. Meanwhile the bonus scheme would increase arable land as an essential first step.

Mr. Gardner's bill in its repriced form was made public earlier. It now provides for a demand scale of acreage bonus payments.

Mr. Elder's bill was not changed to increase the guarantee advance payment from 60 cents to 70 cents a bushel.

Revised fertilizer plans have been seconded and plans made to reorganize the distribution of fertilizers, storing, stumps, tractors and other machinery, fuel, implements, seeds and other requisites for war time.

To Defeat Crime

Ontario To Offer Cash Rewards To Citizens Who Aid In Pursuit Of Criminals

Toronto.—Attorney-General Gordon Conant announced the Ontario government would offer cash rewards to persons who perform outstanding service in the apprehension or pursuit of criminals.

The attorney-general made his announcement at a conference of the chiefs of police and members of the police commissions of Toronto and its entire suburban area. The conference was called, Mr. Conant said, because of the recent increase in the number of serious crimes in the province during the last few weeks.

Import Control System

France Is Changing Trade Trade With Japan

Paris.—Japan's secret trade with France and her possessions was placed under strict control by a decree which was effective May 10, barring Japanese from buying in France special certificates which Japan by French consular agents or the French commercial attaché.

The decree, published in the official gazette, will obligate Japanese government to obtain the necessary permission by the French parliament.

Merchandise proven to have been shipped from Japan before May 10 will be permitted to enter French territory under prevailing regulations.

Authoritative French quarters said the move was essentially a commercial regulation, substituting an import control system for the existing trade measures.

Chinese Will Celebrate

Vancouver.—The Chinese government has announced for the celebration of the Chinese New Year, which falls on Feb. 28, the opening of the King and Queen next day. The festivity will last from dawn to dusk.

Polish Independence

Italy Convinced That Poland Should Survive As Nation

Rome.—Italy is convinced Poland should survive as a nation and deserves an honorable segment of the German-Polish negotiations, Polish quarters said in comment on conversations opening at Lake Como between Foreign Minister Von Ribbentrop of Germany and Foreign Minister Count Ciano of Italy.

These sources indicated Italy would have little enthusiasm for a war provoked by Germany's demand for annexation of Danzig and Pomerania, but would feel bound to join its axis partner if Great Britain and France were to put into effect their guarantees to Poland.

In his address the former foreign minister supported the Churchill government's present foreign policy but urged the Winston Churchill first lord of the admiralty and minister of munitions during the Great War, be invited into the cabinet.

His views were expressed in the preface to a collection of his most important speeches in which he now enjoys that "at least, the world now enjoys that there is more than may be required to bring about an understanding of the Great War, and France were to put into effect their guarantees to Poland.

CAPTAINS ROYAL LINER

Captain W. G. Bush-Wood, R.D.N.R., commander of the Canadian Pacific liner Empress of Australia, which brings Their Majesties to Canada.

on one-half the cultivated land of the farmer, not exceeding, however, 200 acres.

For the purpose of this section of the act, the Peace River districts of British Columbia and Alberta are deemed to be one province.

Mr. Gardner's measure applies only to emergency years and the bill next Aug. 1 shall be an emergency bill.

Immediately after the battleship had downed the ways also broke one of her anchors. Her other anchor was dropped and she was brought safely to rest in the middle of the River Mersey.

Britishers Expelled

Six Are Ordered To Leave Germany May 24th

Berlin.—Six British subjects, including Hugh Carleton Green, Berlin correspondent for Great Britain's Express of Dr. G. Rose, London's correspondent of the National Zeitung of Essen, and other Germans residing in the United Kingdom.

They are ordered to leave Germany by May 24. The order was in reply to a Great Britain's express of Dr. G. Rose, London's correspondent of the National Zeitung of Essen, and other Germans residing in the United Kingdom.

They are ordered to leave the Reich, with Mr. Green, a merchant; H. Tink, a professor of English, and R. P. Smith, an engineer of Dusseldorf; H. L. Lovell, a manufacturer at Cologne, and a Mr. Farwell, head of a Hamburg corporation.

Britain's New Battleship

Second Bolt Under Rearmament Program Has Been Launched

London.—The second of the 25,000-ton battleships ordered under Great Britain's new rearmament program was launched and named the Prince of Wales. The Princess Royal, the King's sister, christened the new ship.

Immediately after the battleship had downed the ways also broke one of her anchors. Her other anchor was dropped and she was brought safely to rest in the middle of the River Mersey.

BRITAIN FEARS FOR OUTCOME OF SECURITY PACT

London.—The fate of Britain's peace policy was a question mark.

Sixty-four men who were released suddenly from high Soviet posts at their "own request" have disappeared.

Silence and official silence as to the significance of Litvinoff's disappearance heightened the impression in diplomatic circles of imminent crucial developments.

Soviet newspapers devoted a few lines to announcements of the man who for close to 20 years has played an important part in Russia's relationship with other nations.

For Britain and Britain's allies were wide apart on their interpretations of this latest move, coming in the midst of delicate Anglo-Russian negotiations on a new European entanglement on the part of Britain.

Some Britons believed it meant probably a shift toward friendlier relations with Germany or at least toward a neutrality which would be welcome to Germany.

Others took the opposite view that Britain's policy of allying itself so definitely with the nations which oppose further expansion of Chamberlain's reich that Molotov, on the other side of the circle of leadership, had been chosen to conclude the deal. Litvinoff had been welcomed into the inner circle.

The appointment of Molotov was given from the point of view of the morning papers without comment. A four-line item on back pages reported Litvinoff had asked to be relieved of his post.

The Foreign Office said he had been released "from his duties at his own request," the same words used last September in announcing the departure of Nikolai Yezhov from his post of commissar of internal affairs. Yezhov was retained as commissar of water transport.

SOVIET COURSE IN FOREIGN AFFAIRS STILL A MYSTERY

Moscow.—Joseph Stalin took a stronger grip on Soviet Russia's foreign policy through displacement of Maxim Litvinoff, now internationalist, by Prezhniy Vyacheslav Molotov as commissar of foreign affairs.

The shake-up put Stalin's "right hand" on the helm of foreign policy and removed the internationalists, a collective who had been his strongest supporters.

It stirred the axis to jubilant exclamations and brought new uncertainty to Britain and France.

But only the Kremlin knew how far the Soviet course in international politics might be changed by Premier Molotov's assumption of the post of commissar in the midst of attempts to sign Russia with the anti-aggression countries headed by Britain and France.

Molotov, who speaks only Russian and German, is an ardent nationalist, in sharp contrast to Litvinoff, a man of many languages, a veteran figure at Europe's council tables.

Litvinoff's future was a question mark. Some 60 men who were released suddenly from high Soviet posts at their "own request" have disappeared.

Silence and official silence as to the significance of Litvinoff's disappearance heightened the impression in diplomatic circles of imminent crucial developments.

Discounts War Talk

Convinced Europe Will Solve Problems By Peaceful Means

Rome.—Romania's foreign minister Grigore Galaciu, said his tour of five major capitals had convinced him Europe would solve its problems without war.

His statement was made after conversations with Mussolini and King George VI.

Previously he had conferred with government officials in London, Paris, Berlin and Warsaw.

"One thing I found all agree," Galaciu said, "is that Europe's war will mean everyone's ruin."

The Roumanian added, however, while he had found a common desire of war, he had discovered "each of them had a different idea of what peace means."

"Europe's problems meet sharply but I am convinced they can be solved by peaceful means," he said. "The first requirement is to reach a common understanding of what peace means."

London On Civil War

Washington.—City Commissioner Melvin Hazen, breaking a long-standing precedent, decided to act on the King and Queen Elizabeth will be presented to the city of Washington when they visit the nation. "For years," said Hazen, "we have waited for the keys to the capital. One trouble had been that there are so many distinguished visitors."

London has one policeman to every 8,000 of its population.

KING AND QUEEN TRAVEL TO CANADA ON LUXURIOUS LINER

The 21,600-ton R.M.S. Empress of Australia, the Canadian Pacific Steamship's fleet, selected by the British Government as the ship on which King George and Queen Elizabeth are traveling to Canada to follow the decision to keep the battle-cruiser "Repulse" in Europe. The white-painted three-funnelled liner is seen above.

Insect Control

Methods For Dealing With Pests That Invade The Home

Throughout the world, there is a constant warfare between mankind and the insects, stated Dr. Arthur Gibson, Dominion Entomologist, in a recent address. In this small world over 600,000 different kinds of insects have been studied and classified, and probably as many more distinct species await classification. Fortunately, a comparatively small number of insects inflict serious losses, but those that do are objected to strenuously. Every dwelling in Canada is subject to infestation by these creatures.

The most-known household found in all parts of the world spreads pathogenic organisms by carrying them on the hairs or other external structures of their bodies. Some insects, including lice and even the human louse, transmit diseases, such as typhus, cholera and dysentery. From what has been said, it should be realized that measures should be taken to exclude the household from feelings and prevent it from contracting such diseases.

Clothes and carpet beetles cause substantial damage to materials of animal origin, such as wool, fur, furs, furs, and carpets. These insects are present in greatest numbers in spring and summer. Materials subject to attack should not be stored for long periods, particularly during the summer, in cupboards, attics, trunks, and other receptacles, unless precautions are taken to prevent them.

Other unwelcome insect visitors found in dwellings are bedbugs, fleas, cockroaches, silverfish, and ants. Bedbug control not infrequently requires the use of a deadly spray which should be used only by an experienced licensed operator.

If the infestation is light, control may be obtained by spraying crevices and cracks in walls and places where the bugs may be hiding. A useful spray may be made by adding eight fluid ounces of creosol to one gallon of water. The same mixture is used for the control of fleas. Infestations of cockroaches, silverfish, and ants may be disposed of by dusting sodium fluoride in the places frequented by these insects, care being taken to keep domestic animals or children away from the powder which is poisonous.

Full information on the destruction of insects may be obtained from the free charge from the Division of Entomology, Dominion Department of Agriculture, Ottawa. Not only do officers of the Division of Entomology deal with problems relating to insect control, disease, and hygiene, but they also investigate the lives and habits of insects which attack farm, fruit, and vegetable crops, and products kept in store; in fact, all kinds of insects which attack commodities of value.

A Puzzling World

With Pictures For Everyone People Are Thrilled and Bewildered

What a world this is! Science writers report inventions which simplify labour and multiply goods. Wool can be made from skinned mink. Rubber is being made out of asphalt, coal tar, and even spin into cloth for shimmering gowns. Automobile parts and airplanes are made from soya beans. Fertilizer can be produced out of air; beefsteaks are raised by the rays of the sun. There is no need to fear hunger, since synthetic substitutes offer endless varieties of food materials. Yet, amid this plenty and assurance of peace, millions of people are hungry, ragged and homeless, and merchants are worrying about the death of customers for their store of goods. What a world! Toronto's star

A White Elephant

Can Be Something Besides A Sacred Animal to India

A reader asks for the explanation of the commonly used term "White Elephant." Here's Webster's definition:

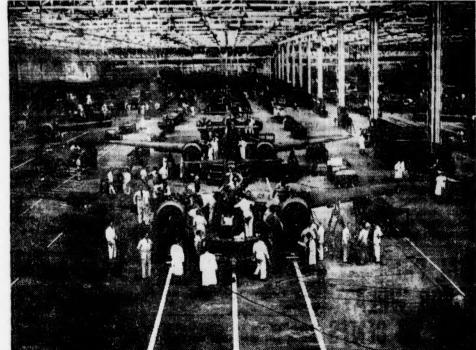

(1) An abhorred Indian elephant of which more or less of the usual fat pigment is absent from the skin, giving it a pale color. Such elephants are rare, and are venerated in India.

(2) Hence, something requiring care and expense and yielding little profit, any burdensome possession.

Of course, modern kitchens are smaller than the old-fashioned ones. You don't require as much room to open a can.

A \$4,000,000 German company has been formed to sponsor growth of cotton in Southeastern Europe.

BRITISH PLANTS MANUFACTURE PLANES IN GREAT NUMBERS

Concrete evidence that Great Britain is rapidly overhauling the leaders in the armament race is this picture taken in Lancashire at the gigantic Roots aircraft factory. The planes shown are being assembled at the fast Bris-
tol Blenheim bombers, one of the fastest bombing planes now being produced.

A Man Of Genius

Lord Tweedsmuir Hon Great Adviser For Lawrence Of Arabia

If Lawrence of Arabia were still alive—and unpaired mentally and spiritually by the Great War—he might be the reorganizer of the British Empire. He would be a dead man, said Lord Tweedsmuir, told the Services, in a speech at the Royal Naval College, Dartmouth, on May 20.

Lawrence, who at the age of 29 led the Arabs against the Turks, was a man of genius, said Lord Tweedsmuir, but he was not a hero-worshiper, and that is the reason he has been subjected to the wear and tear of the edge of the world."

Due to the breach in Lawrence's character between the dreamer and the man of action, the government General believed, he was a good career "that never quite came to fruition."

"In the art of warfare," Lawrence said, "he was a genius. He reviewed the art of war of men as he saw it, and struck by indirect methods in the enemy's power. Wagging his Arabian campaign, the British leader practised indirect approach, smashing at the nerve centre and morale of the enemy.

Birds At Celebration

Jack Miner celebrated his 74th birthday by rising at 5 a.m. to view the arrival of 10,000 birds at his home, and some of them on his Kingsville estate. By their presence, the feathered friends showed their appreciation of his kindness and it will be well for them if he enjoys more happy returns of the standard equipment of all librarians.

Thoughtful Man

It was Sunday afternoon; she was reading a book on the sofa, he was reading and dozing in the armchair. "John, have you thought of the canary?" "Yes."

"Have you fed him?" "No."

"Have you given him water?" "No."

"Then what have you done?" "Thought of him."

One of the oldest games in England is quoits; it dates back for four centuries.

According to recent figures, 527 German refugee scholars have been permanently re-established in 27 countries and 290 temporally placed in 25 countries.

Cost Comparatively Small

Film Industry Makes Rare Documents Accessible to Research Students

The development of a specialized branch of the film industry is bringing greater facilities for research students. The cost of research solves handicaps by the impossibility of securing copies of rare books, newspapers and documents which have been made available which presents the filmed reproduction of the required material. As there is no limit to the number of film copies which may be made, rare and valuable books can be conveniently subjected to the wear and tear of the use of a copy.

The cost of a copy may be readily stored and indexed. By installing the necessary machines, a library commands the whole of the world's output of learning for its readers' benefit. The cost of the new process of document utilization is comparatively small and naturally, when it becomes more generally used, the cost will become still smaller. It is not unlikely that in the near future reading of the cinema will become a part of the standard equipment of all libraries.

Thoughtful Man

It was Sunday afternoon; she was reading a book on the sofa, he was reading and dozing in the armchair. "John, have you thought of the canary?" "Yes."

"Have you fed him?" "No."

"Have you given him water?" "No."

"Then what have you done?" "Thought of him."

One of the oldest games in England is quoits; it dates back for four centuries.

Christopher Columbus set out on his voyage of discovery on a Friday.

Preserving Canada's Elk

Shipment Is Sent From Buffalo National Park To Saskatchewan

Another shipment of elk from Buffalo National Park to Saskatchewan is to be sent by the Department of Mines and Resources, Ottawa. Twenty-one elk were shipped from Wainwright, Alberta, to Shipman, Saskatchewan, a railway siding north of Prince Albert, where the animals will be released. The elk were in splendid condition when loaded and in order to ensure their safe delivery they were placed in four separate cars, each car and were accompanied by a park warden.

This is the second carload of elk to be transferred to Saskatchewan, a previous shipment of 25 animals having gone to Cypress Hills in the southwest part of the province. Ranchers in the Cypress Hills area are taking a particular interest in the elk and report that the herd has grown to 27. The shooting of suitable areas with these animals provides an outlet for the elk surplus to the grazing capacity of Buffalo National Park and arrangements have been completed for another shipment of approximately 25 female elk to Cypress Park, which will go forward at a future date.

On the strength of this information, yet herds of elk now range in several of the national parks of Western Canada, and the restoration of the magnificence of the deer family in different parts of the Prairie Provinces is the result of a conservation effort of the first rank.

A Deserved Promotion

Door Of Opportunity Is Still Open

To The French

A short article titled "A Frenchman's Dream of Opportunity" in an inside page contains a story which should interest Canadians. It states that G. C. Monture, editor-in-chief of the Department of Mines and Resources, has been appointed chief of the division of mineral exploration of the million Bureau of Mines. Added information tells how, at 42, Mr. Monture is a retired drama star, "Must Watch," concerning an incident in Upper Canada after the rebellion of 1837.

CBC officials expressed satisfaction with results of the contest conducted to foster radio writing in the Dominion.

Buy From Local Stores

Buying from local stores is the best way of purchasing. When goods are bought at the door from strangers, there is no guarantee either of quality or quantity. Local storekeepers must guard their reputations, and a responsible salesman may be in another town, even the defects may be found in the goods.

Saved Cannon Balls

During his defense of Metz in 1802, François, Duke of Orleans, used nuts in his canon to bombard the attacking Spanish forces. By using this "ammunition" during ordinary assaults, he conserved his cannon balls for enemy mass attacks.

Christopher Columbus set out on his voyage of discovery on a Friday.

Supplies of native wheat in Bélgum are said to be small.

Has Variety Of Cases

Red Cross Nurse Servs In Isolated Outports On West Coast

Miss Mary A. McLean, a young graduate nurse, minister to the medical needs of the handful of whites and 200 Indians at Kyuquot, B.C., who form the population of the isolated west coast Vancouver Island outport.

In charge of the Canadian Red Cross Society hospital there, the former Vancouver girl faces a variety of cases almost every day. Traps and fishermen, as well as Indians, come to her for advice in time of illness.

The nearest doctor is at Babineau, the new gold camp town 45 miles south and 100 miles west, reached by gashow. The nearest point to the north, Port Alice, can only be reached by traversing the rough waters around Cape Cook or by plane.

Only recently did Miss McLean's service have been credited with saving several lives by administering emergency treatment. In serious cases she gives first aid; then calls a plane by radio telephone to take the patient to the nearest hospital.

Within a 20-mile radius of St. Paul's Cathedral, London, 171 different types of wild bird life have been observed.

A loose bolt in the car can be as dangerous as a tight nut behind the wheel.

Japan has begun to grow Virginia tobacco with success.

Reunion Island

Where France Keeps A Prisoner Who May Prove Valuable

On the tiny island in the Indian ocean, France has an open prison where she keeps her most valuable prisoner—against the day when she might have to fight for her African empire.

This island is Reunion, a tiny speck 420 miles to the east of Madagascar. Its area is 970 square miles, its population 197,000.

Reunion has unique importance in French colonial history. It is here that France has sent her most exiled prisoners, native emperors, queens, chieftains who go into confinement with their wives and children.

The most prominent inhabitant of Reunion is Abd-el-Krim, leader of the Rif rebellion in Morocco during the early twenties. Abd has lived in exile since 1926 when, after surrendering to the French, he was exiled with his two wives and their six children who insisted on sharing his fate. At present, his household consists of 120 persons.

Repeatedly Abd has assured the French of his loyalty and offered to head a strong pro-French movement among the natives of interior Morocco. Not long ago he was offered the French government to let his two sons enter the military academy of St. Cyr.

The most prominent champion of negroes is Abd-el-Krim, leader of the Rif rebellion in Morocco during the early twenties. Abd has lived in exile since 1926 when, after surrendering to the French, he was exiled with his two wives and their six children who insisted on sharing his fate. At present, his household consists of 120 persons.

No Sporting Adventure

Every Detail Of Yankee Clipper's Flight Is Revealed

Captain Harold E. Gray's account of the trip made by the Yankee Clipper to Europe and return to America is a story which should interest Canadians. It states that G. C. Monture, editor-in-chief of the Department of Mines and Resources, has been appointed chief of the division of mineral exploration of the million Bureau of Mines. Added information tells how, at 42, Mr. Monture has already had a distinguished career in the public service.

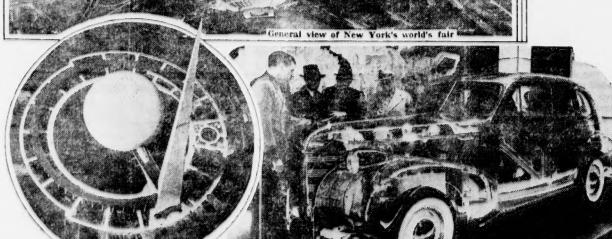

The extraordinary part of Mr. Monture's story is that he is a native of the Six Nations Reserve at Brantford and a grand-grandson of the famous Iroquois chief, Joseph Brant.

Mr. Monture's career in the public service is proof that in this country most doors are still open to people who are willing to work when their race may be. It is an indication that ability that is not confined to the lordly white man. Brant's qualities of leadership were unique, and his descendants might be expected to be equally good. But it is comforting to note that we have not taken the country entirely away from the Indians. Mr. Monture's record shows that race is not inferior in intellectual attainments to other Canadians. His people should be proud of him, and other Canadians should be glad that he has had an opportunity to make the most of his talents.

The Yankee Clipper's performance is testimony to the dependability of the airplane and its reliability as a means of transport. For several years every detail of the flight reveals the care and pains taken in preparation for a transatlantic service which preceded it. This is shown in small things having to do with passengers' comfort, as well as in the large things in the arrangement of a cabin, the use of a strong light, the efficiency of the base facilities, and the exactness of the weather reports.

The Yankee Clipper's performance is a credit to the performance of the airplane and its dependability as a means of transport. For several years every detail of the flight reveals the care and pains taken in preparation for a transatlantic service which preceded it. This is shown in small things having to do with passengers' comfort, as well as in the large things in the arrangement of a cabin, the use of a strong light, the efficiency of the base facilities, and the exactness of the weather reports.

NEW YORK'S WORLD'S FAIR OPENS PAGEANT OF WONDERS

Forecasting the wonders of the "world of tomorrow," the New York world's fair was opened April 30—presenting a vast pageant of engineering marvels to which the entire world has contributed. Covering a vast acreage of the Flushing meadows of Long Island, the fair is one of the most ambitious expositions of skill and genius. The lighter side, entertainment and recreation, also is not neglected.

MR. CAFFEINE-NERVES . . . He is expelled from school

STRAIT GATE

By RUTH COMFORT MITCHELL

D. Appleton-Century Co., Inc.
W.H. Service

CHAPTER IX—Continued

They climbed to a thousand feet, two thousand feet, and then fell away beneath them. Human beings took on the value of playthings—puppet people with toy automobiles. There was likewise a toy ambulance.

At three thousand feet Gunnar noticed: "Hurry! Now you go!" he shouted hoarsely.

Sarah Lynn stood up and made her bulky way toward the opening. She might be the palest living person he had ever seen.

"Fling yourself from the ship. Make sure you are clear. Count a slow ten before you pull the cord!" His voice was jerkily. "Wait! You are sure? You wish to go? There is no need, if you—

Suddenly Sarah Lynn laughed aloud, filled with a wild mirth which was ready to burst. "I have no fear of death!" she mocked him. "Life is one adventure: death is another!" She was confident, shining, radiant, but as she made a forward movement his arm shot out and caught her, pulling her against him.

"Sarah Lynn—" he said her name quietly in a choked voice, and kissed her, a fierce kiss, deep and desperate.

Then she was leaping out into swift and stinging air, and was amazed to find that she did not immediately fall. The wind was blowing beneath her, the Hermod was carrying her along, her downward progress was halted so abruptly that she thought her arms and shoulders were being torn loose from her body. She was confused and then peace enveloped her.

There was a weird noise which was suddenly, catching the air and dragging the main clause into a long, thin bottom and expand it. It simply couldn't fall; Gunnar and Conrad and Vance Le Roy had checked it thoroughly. "And even if it doesn't fall, she'll tell her mother that there is the emergency chute!" Gunnar kissed me! He was white as a sheet and scared to death about me, and I'm scared," she said, and then kissing him again.

There was a weird noise which was suddenly, catching the air and dragging the main clause into a long, thin bottom and expand it. It simply couldn't fall; Gunnar and Conrad and Vance Le Roy had checked it thoroughly. "And even if it doesn't fall, she'll tell her mother that there is the emergency chute!" Gunnar kissed me! He was white as a sheet and scared to death about me, and I'm scared," she said, and then kissing him again.

"It's opening!"

The gun went off somewhere, a short, sharp, thunderous boom, and her downward progress was halted so abruptly that she thought her arms and shoulders were being torn loose from her body. She was confused and then peace enveloped her.

Her chute opened and was functioning perfectly. She was floating gently, and everything was quiet about her, a sweet, celestial quietness which was soothed and comforting.

She could see the ambulance moving away to keep its line straight. When Abraham Lincoln was born, she had been a tiny Hermod for the moment, but surely Gunnar would land as quickly as possible and come to her. That kiss, she felt, was not fruitless; it might be a prelude to something more. She was not alone; it had been a high excitement; it stood for an emotion which wasn't to be disposed of with this adventure. Fliers did not marry. Oh didn't they? Then what?

There was a confused clamor of voices, cheerful, exultant.

"Good girl!" Conrad Jordan said, lifting her to her feet. "Perfect performance!"

"Atta girl!" Vance Le Roy was unfastening her harness, warmed for once into enthusiasm.

"You're Gunnar!" Sarah Lynn demanded.

Old Pete from the airport was awfully surprised and happy, paying her high praise with picturesque compliments.

"Hold still—" Conrad Jordan had

seemed to be lost in the webbing. Why hadn't she kept her hand on it all the time? The time had come, and the Hermod still stayed here, but further away, somersaulted and saw the earth rushing up to meet her. Why hadn't Gunnar taken her higher than that then?

Sarah Lynn thought suddenly of her mother. She had a poignant picture of Adelaide Dana's upstairs sitting-room, pretty and peaceful, with polished piano when the young girl had a temporary washing, temporarily in an expensive cage, and quantities of framed photographs of her big brothers and herself and young Bill in all stages of infancy and childhood.

taken out his handkerchief and was wiping her face, and there was bright blood on the white linen.

"What's the matter?" he asked impatiently. "I'm not well."

"Of course you're not just a scratch or two when you were dragged."

"What's Gunnar?"

"I'll be here as soon as possible to get the ship down," her uncle's friend said. "Now we'll just get aboard and let them run us back to the airport. I'll be there in a minute."

She turned toward the ambulance.

"I'm hurt. I'm not going to ride in that thing!" she told him spiritedly. "Where will we come down?"

"Quickest way to get there," he said, taking her hand in a firm grip. "We'll all pile in. Half a mile away!" He lifted her and set her inside and a white-suited orderly grimmed and congratulated him.

"I want Gunnar," Sarah Lynn said.

"He'll be here in a jiffy. Lynn and your Granney need to see you before we can convey you to the hospital," he said. "We'll all come according to schedule? Did it follow the pattern?"

"Oh, perfectly!" It was an automatic answer, she answered, starting to look on the balance. "I don't see the Hermod."

"But you have to see him! Right over us!" Vance Le Roy said.

"I'm not married," she said, and the matronly voice of the old dame greeted her in character.

The ancient woman saw in her the reincarnation of her own dim, daring youth, chancing, as she had, the first brilliant adventure of her period, and the pantylike and limated his own helplessness in her courage and skill.

"I told 'em it was all plain foolishness, tagging along with us to the hospital," she said. "Sarah Lynn," her great-grandmother said, "I said you'd come down like a leaf off a tree. Unless we make more minds to lead us, dark ones."

Lynn smiled into her eyes. "I'm glad for you," he told her. "I'm glad and proud. You're given me my life."

Miss Pennington's high color was faded but her diction was as crisp as always. "Let me tidy your hair a bit, then bustle up to her. I should like to have you wear out a close net."

The girl slipped out from under her hands. The Hermod was down and Gunnar Thomas was down, too, toward her. "I should like to have you wear out a close net."

"I'll know as soon as I see his face," she told herself. "I'll know the first second."

Gunnar was still white, but she saw at first glance that he was angry, and her heart turned over in terror. A look of friendliness of any sort, she did not know what it meant.

"I'll know as soon as I see his face," she told herself. "I'll know the first second."

GOODYEAR'S NEW TREAD
TO INCREASE YOUR
TIRE MILEAGE . . .

The new
GOODYEAR G-100
is designed to
give you MORE
MILEAGE . . . save
your money!

When air flows
into the G-100
it compresses the
tread, making it
easier to cut, and
more resistance to
wear . . . resulting in
far greater mileage
possibilities than
any tire put in a
tread before.

See the G-100
today—it costs
no more than
any standard
tire!

Look for the fluted
sidewalls

THAT EXTRA TEN CENTS

Announcement was made from Ottawa last Wednesday that the Hon. W.D. Eadie had introduced a bill in the Senate to amend the Wheat Board Act whereby the proposed minimum price for wheat would be raised from the present minimum of 60¢ per bushel to 70¢ per bushel, to a maximum of 90¢ per bushel to be marketed by any one farmer. Along with this will go the acreage bonus and it does not appear that it will be satisfactorily settled for some time to come.

NOTICE TO CREDITORS
AND CLAIMANTS

IN THIS MATTER OF THE
ESTATE OF ELMER JEROME
HILL, of the Village of Carbon,
Carpenter, the deceased,

NOTICE is hereby given that all persons having claims against the above named Elmer Jerome Hill who died on the first day of February A.D. 1939, are requested to file with Mrs. Grace G. Greenan, Administrator, Carbon, Alberta, by the first day of July, 1939, a full statement duly verified of all claims of any kind, either by letter or telegram, and that date the administrator will distribute the assets of the deceased among the claimants in proportion having regard only to the claims which notice has been so filed or which have been brought to her knowledge.

Dated this 9th day of May, A.D. 1939.

JOS. J. GREENAN,
Solicitor for the Administrator
Carbon, Alberta

Commercial Printing

Do not try to economize on necessary expenses. Neatly printed business stationery is just as important to your business as any other of your necessary expenses, and it is poor economy to do without it. Blank writing paper and forms on which your name is written in ink do not raise the prestige of your business. And if it's economy that you want, see us and find that our new prices are most reasonable.

The Carbon Chronicle

Snickle-fitz

McNab was implored to marry him, but she objected: "Ye ken Ah canna, Tugall, till Ah have used a' the fifty cards Ah has prentit for yeestin'!"

"And what?" she asked, "should a lassie say to the lady who has given him a penny for carrying her bundles?"

"I'd have to tell you," replied the modern youth.

Mrs. Jones: "How are the eggs?"

They were sent by air mail direct from the farm.

Jones: "Humph! One more day and they could have flown here by themselves."

Doris: "When is your sister thinking of getting married?"
"Benn!"

Beneath this stone lies Murphy,
They buried him in Riley.

Economical Housewives

There was a day when the housewives bought the faraway "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things. Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in CARBON
